

# ZYNOFLO

Simple, Safe, Smart Infusion Solution

## ZynoFlo Clinical Integration

### Improves Patient Safety

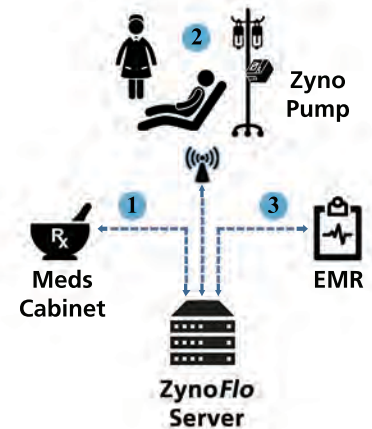

- Reduces medication administration errors with 5 rights medication order verification.

### Increases Nurse Productivity and Job Satisfaction

- Minimize manual dosing calculations and manual pump programming. Less back and forth walking between patients and nursing station.

### Protects Revenue

- Automatically captures complete and accurate IV infusion start and end times.

## Measurable ROI

- ✓ *For less than \$1 per pump per day, ZynoFlo ensures every infusion is billed with complete and accurate supporting evidence.*
- ✓ *ZynoFlo saves EVERY infusion nurse a HALF-MILE of walking between patient chairs and the nurse station, and typically more than one hour of documentation time EVERYDAY! \**

#### Typical Workflow

- Nurse walks continuously between patient and nurse station

#### ZynoFlo Workflow

- Infusion start and end times are automatically captured

*"Our wireless system allows me to spend more time with patients, less time running back and forth, charting and completing calculations, and increases my confidence that the drugs will infuse over the time that they are ordered."*

*--- A ZynoFlo Nurse User*

\* Based on analysis of a oncology infusion center with 3 nurses, 16 chairs, 45 patients, 135 infusions everyday

**Simple, Safe, Smart Infusion System  
For Outpatient Oncology Infusion Centers**
