ZynoFlo
Integrated Infusion System

ZYNO SOLUTIONS
Intelligent Infusion Systems

Enhance Patient Safety

Automate Time Capture

Standardize Workflow

Maximize Revenue

Intelligent IV Infusion Management

- Integrate infusion pumps directly with EMR systems
- Automatically document start and stop times
- Actionable information for process improvements
- Accessible audit trail of infusion times for enhanced billing

ZynoFlo
Integrated Infusion System

The ZynoFlo Integrated Infusion System is a turnkey, cloud based system, used to manage the integration of the Zyno Medical Infusion pumps with EMR systems. This integration creates an opportunity for nursing, pharmacy and billing to standardize their infusion workflow and enhance documentation.

Workflow standardization can reduce manual documentation of start and stop times and with the ability to gather the infusion pump data can provide actionable information for process improvements. ZynoFlo fills the system gap in the IV infusion workflow to bring billing capture, workflow productivity and patient safety enhancements to the IV infusion suite.

Enhances Workflow Productivity

- Integrates infusion suite systems to establish IV infusion communication
- Cloud based applications for nursing, billing and pharmacy
- Centralized view of infusion status
- Data to support workflow and continuous quality improvements

Direct Medication Information Access

- Saves time by automatically loading medication information
- Display patients orders on the pump for selection
- Manages standardized infusion parameters that are accessible on the pump
- Pharmacy has direct view of ongoing infusions to manage workload

Patient Specific Infusion Information

- Patented Patient Query provides patient list on the pump
- Patient specific infusion orders for selection on the pump
- Supports nurse identification for each infusion
- Captures start and stop time for infusions

Advanced Documentation

- Automatically sends drug start and stop times to the chart
- Reduces the time to enter infusion data, just verify information
- Enhance billing accuracy and completeness with automation
- Spend more time on patient care then on documentation
